CITYWRIGHT Quick rules 快速规则

Draft a ruler from around the shared site board. Its position gives you tiles; its shape says how you draw them on your own 7×7 table. Everyone takes 12 turns. Highest total wins.

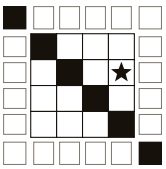

从场地数据板四周选一把模板尺：位置决定你拿到哪些板块，形状决定它们怎样画到你 7×7 的绘图台上。每人 12 回合，总分最高者胜。

Rounds × turns each 轮数 × 每人每轮回合	**Solo 单人** 3 × 4	**2 players 二人** 3 × 4	**3 players 三人** 3 × 4	**4 players 四人** 4 × 3	**= 12 turns each** 每人都是 12 回合

Setup

One city sheet and one pencil each. No erasers: charcoal doesn't erase. Shuffle the four-cell and five-cell rulers as two decks. Mix the 16 tiles in a cup and fill the site board at random. Deal 16 four-cell rulers to the edge slots and 4 five-cell rulers to the corners. Whoever visited a park most recently is the start player and seat 1. Seats run clockwise and never change.

Your turn: 3 steps

1 Draft. Take any one ruler from its slot. It is gone for this round.
2 Take tiles. Top or bottom slot: that column. Left or right slot: that row. Corner slot: that diagonal plus 1 required free pick from any of the 16 cells. You copy the tiles; they stay on the board all round.
3 Commit. Draw the tiles on your 7×7 drawing table in the ruler's shape. Rotate or flip it, use any empty cells. Arrange the tiles on its cells as you like, except that the free pick goes on ★. Tick the shape on your sheet.

Committing

Never draw over a filled cell. A ruler may hang off the edge: tiles on those cells are lost, but at least 1 must land. If this ruler truly has no legal placement, discard it with its tiles and end your turn; it earns nothing for achievements. If any placement is legal, you must make it.

End of round

Tiles back in the cup; refill the board at random. All rulers, taken or not, go to their deck's discard pile. Deal fresh rulers; if a deck runs out, shuffle its discard pile and keep dealing. Pass the start marker clockwise.

Scoring

Residential. Largest cluster: +5 per 2 tiles, round down. Second-largest cluster: +1 per tile.
Commercial. All tiles: 5–9 = 5, 10–14 = 15, 15+ = 30. Each tile beyond 15: +1. Each isolated tile: +2.
Park. Each park touching residential or commercial: +1. Each row with a park: +2. Each column with a park: +2.
Industrial. Each tile on the outer ring: +2. Every 2 tiles anywhere: +3.
Touching means sharing an edge. A cluster is same-type tiles joined by edges.

Achievements

Versatile 6 / 7 / 8 / 9 different shapes placed: 6 / 8 / 11 / 15. **Mastery** each 4 placed of one shape: 7. **Perfectionist** all 49 cells filled: 12. **Bustling** largest residential cluster ≥ 8: 8. **Industrial Pillar** largest industrial cluster ≥ 6: 8. **Tree-lined** highest Park score at the table, all ties: 8.

Final total

Districts + achievements + seat bonus. Seat bonus: 2 players 0 / +1; 3 players +2 / +2 / 0; 4 players +2 / +2 / +1 / 0; none solo. Ties: fewer empty cells, then more different shapes placed, then a shared win.

Two players

Take out every ruler tagged NOT 2P: 20 four-cell and 8 five-cell remain. Instead of using a corner ruler you may remove it from the game and draw 1 tile of any type on any empty cell. That earns nothing for Versatile or Mastery.

Solo

Full deck. After each draft the rival apprentice removes the ruler at the opposite end of the same line, if it is still there: top and bottom, left and right, opposite corners. Tree-lined needs Park ≥ 40. Rank: Intern 0–109, Apprentice 110–134, Draftsperson 135–154, Architect 155–174, Master 175+.

准备

每人一张城市图纸、一支铅笔。不准用橡皮：炭笔落下就擦不掉。四格尺和五格尺分开洗成两叠。16 块板块放进杯子混匀，随机铺满场地数据板。四条边发 16 把四格尺，四个角发 4 把五格尺。最近去过公园的学员是起始学员，坐 1 号位，座位顺时针排定，全局不变。

你的回合：三步

1 选尺。从任一槽位拿走一把模板尺，本轮不再出现。
2 拿板块。上下两边：该列。左右两边：该行。四角：该斜线，外加必选的 1 块自选（16 格任选）。只是照抄，场地数据板上的板块整轮不动。
3 落笔。按模板尺的形状，把板块画到你 7×7 的绘图台上。可旋转、可翻转，放在任意空格。哪块画在哪一格自己定，只有自选的那块必须画在 ★ 格。最后在图纸上给这个形状记一笔。

落笔规则

不能覆盖已画的格子。模板尺可以伸出绘图台，伸出去的板块作废，但至少要有 1 块落在台上。只有这把尺真的放不下时，才连同板块一起弃掉并结束回合，它不计入成就。只要还放得下，就必须放。

一轮结束

板块放回杯子，重新随机铺满。所有模板尺（拿过的和没人拿的）进各自的弃尺堆。重新发尺；一叠发完就把它的弃尺堆洗好接着发。起始标记顺时针传一位。

计分

住宅区。最大连片：每 2 块 +5，向下取整。第二大连片：每块 +1。
商业区。总块数：5–9 得 5，10–14 得 15，15 以上得 30。超过 15 的每块 +1。每个孤立的商业区 +2。
公园。每个挨着住宅区或商业区的公园 +1。每个有公园的行 +2，每个有公园的列 +2。
工业区。最外圈每块 +2。全台每 2 块 +3。
挨着指共用一条边。连片指由共边相连的同类板块。

成就

多才多艺 放过 6 / 7 / 8 / 9 种形状：6 / 8 / 11 / 15。**精通此道** 同一形状每放 4 次：7。**完美主义** 49 格全部画满：12。**人声鼎沸** 最大住宅连片 ⩾ 8：8。**工业支柱** 最大工业连片 ⩾ 6：8。**绿树成荫** 公园得分全场最高，并列都算：8。

总分

四个区 + 成就 + 座位补偿。座位补偿：二人 0 / +1；三人 +2 / +2 / 0；四人 +2 / +2 / +1 / 0；单人没有。平局：空格少者胜，再比放过的形状种类多者，仍平则共享胜利。

二人局

先抽掉所有标着“二人局不用”的模板尺，剩 20 把四格尺、8 把五格尺。拿到角上的五格尺时，可以不用它，把它移出游戏，改在任意空格画 1 块任意类型的板块。这不计入多才多艺和精通此道。

单人模式

使用全部模板尺。每次选尺后，对手学员拿走同一条线另一端的模板尺（如果还在）：上对下，左对右，角对角。绿树成荫要求公园得分 ⩾ 40。评级：实习生 0–109，学徒 110–134，绘图员 135–154，建筑师 155–174，大师 175+。

Print at 100% (Actual size), one side; black and white is fine. Sheet 2 once per player per game. Cut sheets 4 to 6. You also need pencils, scissors and a cup.
打印请选 100%（实际大小）、单面，黑白即可。第 2 页每局每人一张。第 4 到 6 页裁开使用。另备铅笔、剪刀和一个杯子。

Keep a coin on the round; round 4 is for 4 players only. Keep the two decks and their discard piles beside this sheet. Turns in a round: solo 4, 2 players 8, 3 players 12, 4 players 12.

用硬币标记当前轮；只有四人局才有第 4 轮。两叠模板尺和各自的弃尺堆放在这张纸旁边。每轮总回合数：单人 4，二人 8，三人 12，四人 12。

Reading a slot 怎么看槽位

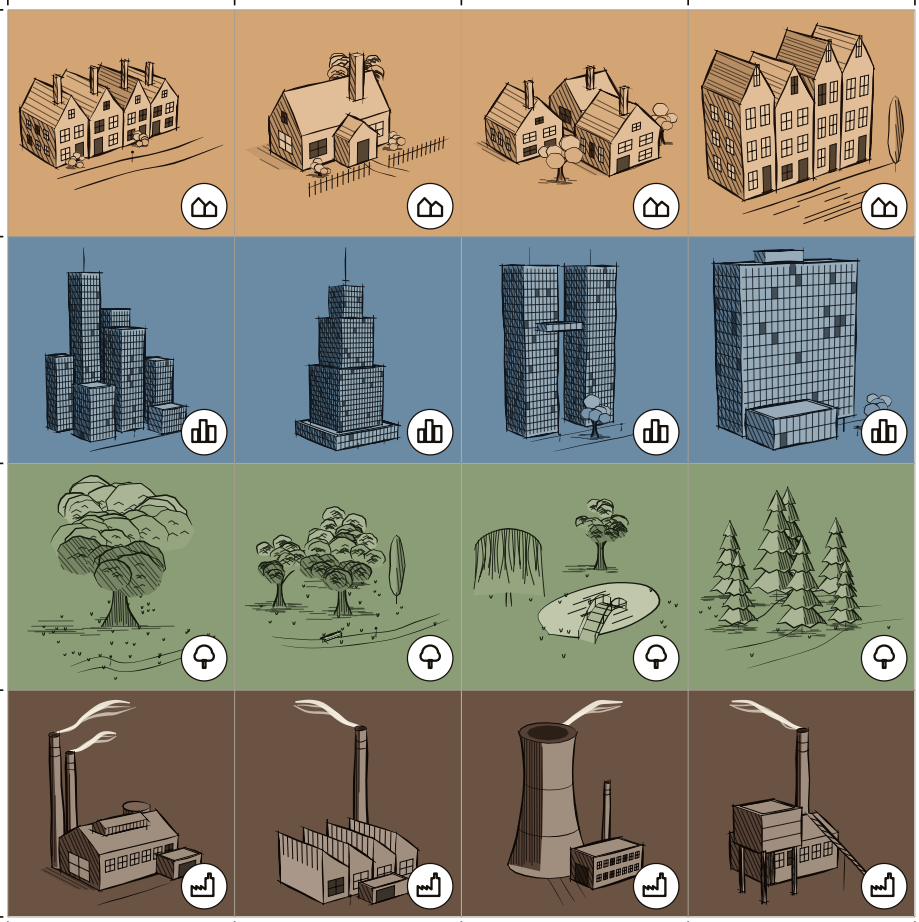

A slot points at the line its arrow enters. A and A, 1 and 1 are the two ends of one line; both give the same 4 tiles. Corners give their diagonal plus ★. Turn rulers to fit; they may stick out past the printed slot.

箭头指向的那条线就是这个槽位能拿的板块。两个 A、两个 1 是同一条线的两端，都拿到同样的 4 块。四角拿斜线外加 ★ 自选。模板尺转一下放进槽位，超出印好的范围也没关系。

End of round 一轮结束

Tiles back in the cup, refill at random. All rulers to their discard piles, taken or not. Deal 16 + 4 fresh rulers. Pass the start marker clockwise.

板块放回杯子，重新铺满。所有模板尺进弃尺堆，拿过没拿过都一样。重新发 16 + 4 把。起始标记顺时针传一位。

Why so few tiles? 为什么板块这么少?

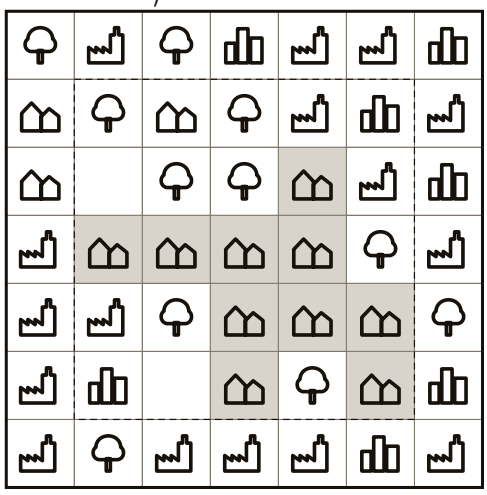

The full game has 240 tiles because each player builds with them. Here you draw your city in pencil, so these 16 are all you cut. They are a menu: they sit on the site board, you copy them, they never leave it during a round.

正式版有 240 块板块，因为每位学员都要拿来拼城市。这里用铅笔画城市，所以只需剪这 16 块。它们是一张菜单：摆在场地数据板上，你照着抄，一轮之内不会被拿走。

Color is optional. The drawing and the corner symbol tell the districts apart in black and white. The start marker is cut the same way; a coin works too.

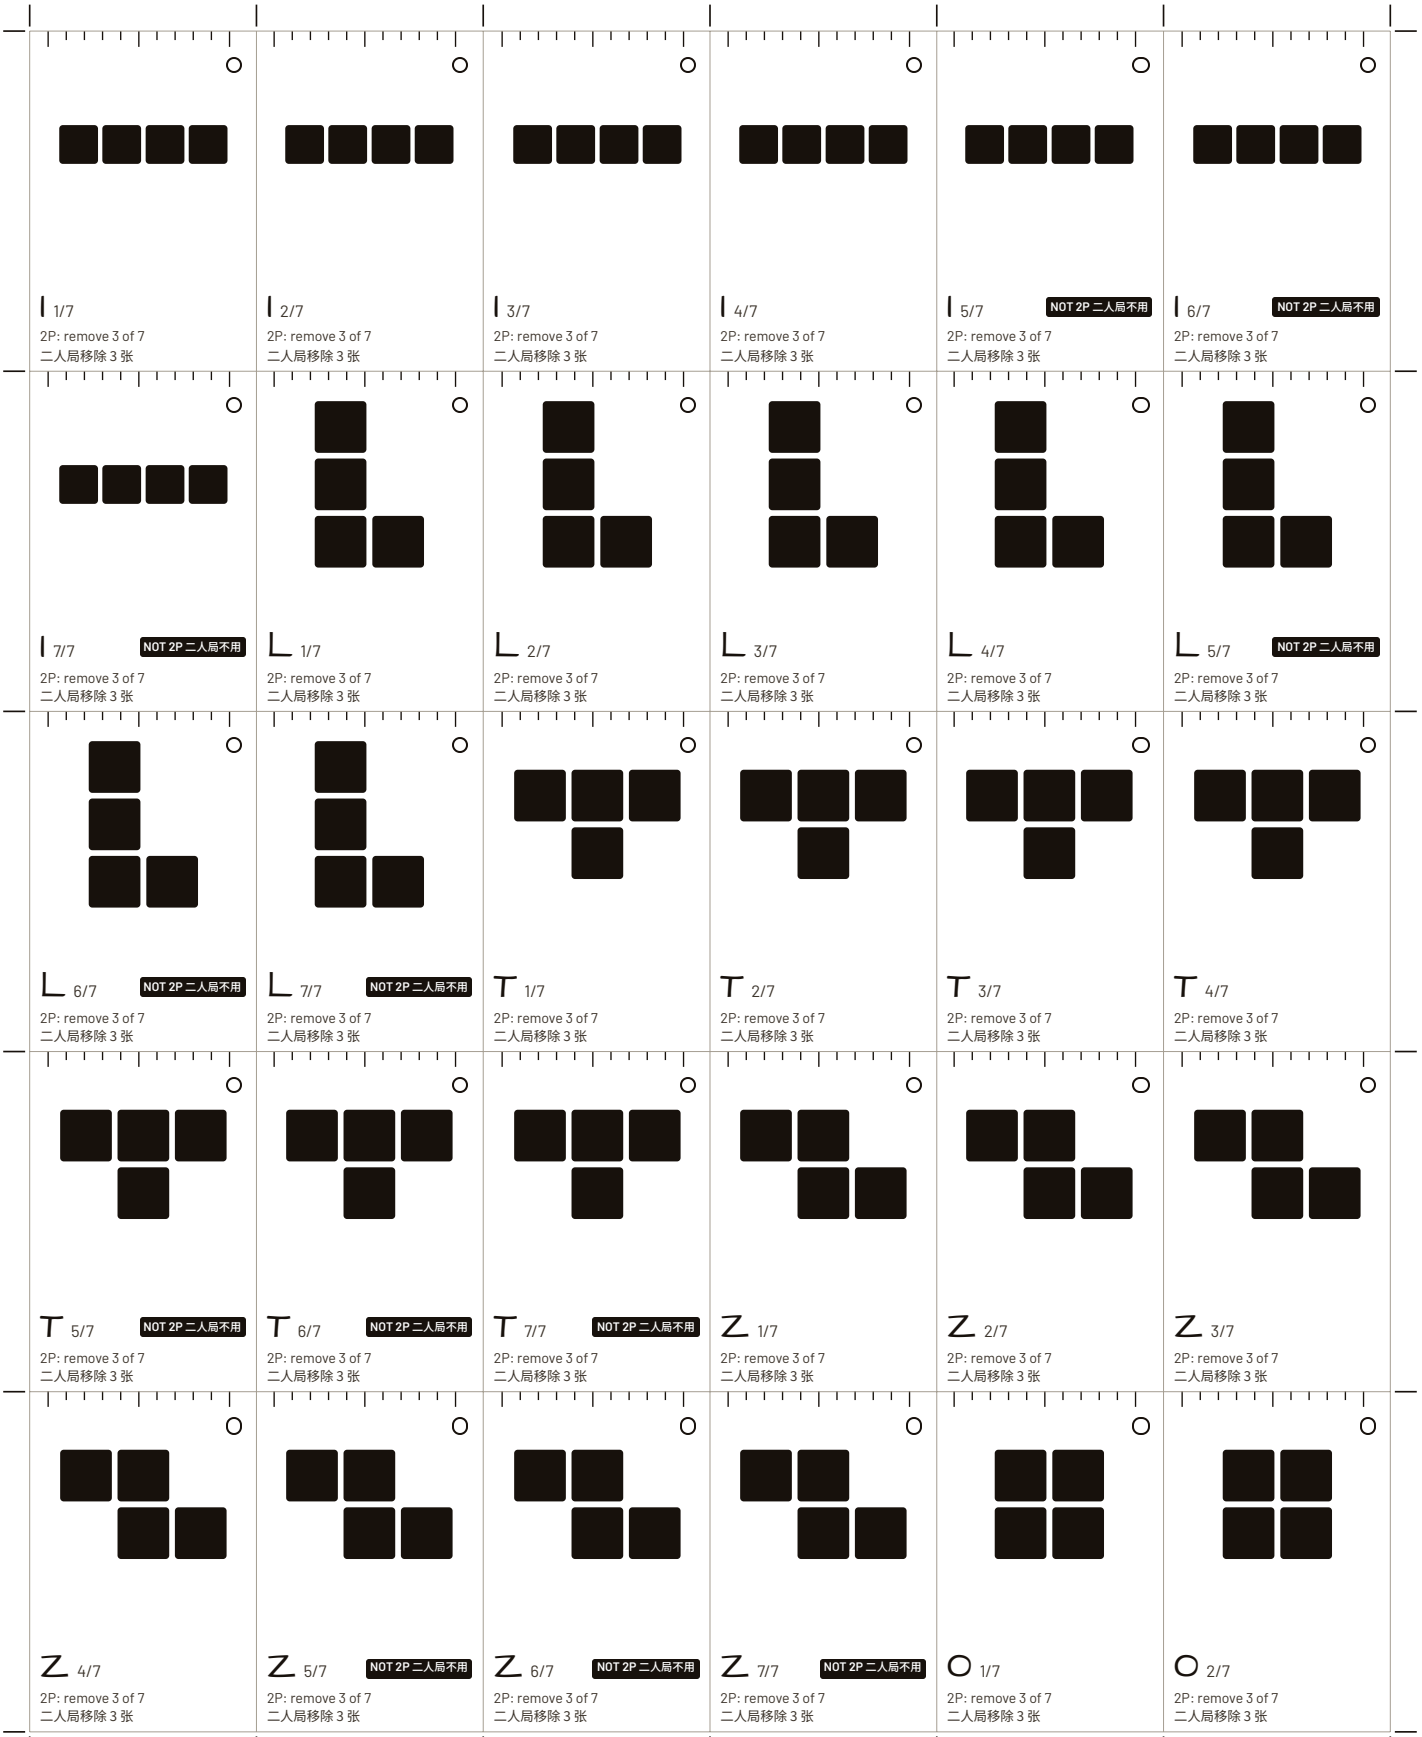

彩印不是必须的。黑白打印时靠图案和角上的符号区分四个区。起始标记也这样剪下来，用硬币代替也行。

You are one of the first real people to play this game. So far its balance has only been tested by AI players, and its play time is a guess. Five honest minutes here tell us what no simulation can. Harsh is fine, and useful. Hand this page, with your city sheets or a photo of them, to whoever gave you the kit.

你是最早真正玩到这款游戏的人之一。到现在为止，它的平衡只有 AI 测试过，游戏时长也只是估计。花五分钟老实写几句，能告诉我们任何模拟都给不了的东西。话说重一点没关系，那样才有用。请把这一页连同城市图纸（或照片）交给把这套材料给你的人。
